

Presenting...

EXTRA VIRGIN OLIVE OIL This is primarily used for dipping at the table or as an ingredient for any dish that requires a rich olive oil flavor. It is an ingredient of Caesar salads, shrimp scampi, and many pasta dishes. The acidity level is less than 1%. It is produced naturally without chemicals or additives. Extra Virgin olive oil is a "cold pressed" product.

PURE OLIVE OIL Used as an ingredient in salad dressings and other dishes that require a lighter olive oil flavor, it is produced from refined grade A olive oil that is basically flavorless and colorless. 15% of extra virgin olive oil is then added for color and flavor.

POMACE OLIVE OIL This is used primarily for sautéing. Processed from refined Grade B olive oil it is extracted using heat and chemicals, but 8% extra virgin oil is added for flavor and color. Pomace has a very light olive oil flavor.

BLENDED OLIVE OIL Used as an ingredient and for sautéing, blended olive oil is a very economical product that can be used instead of pure and pomace olive oils. We offer blends that vary in taste and price to meet the specifications of any given customer's requirements. Our blend of oils range from our highest quality of 50% canola and 50% extra virgin to an economical 90% soy 10% pomace olive oil.
