GREECE The Greeks have a rich history of gastronomy and many of its recipes have become a part of the American diet. The Kalamata region of Greece is well known for its wonderfully flavored olives. The special way that they are cured using olive oil and red wine vinegar gives them their distinct taste. Many countries are now curing some of their olives in a similar manner, but they do not command the price of the original. Remember a true Kalamata olive can only come from the Kalamata region in Greece. However, these substitutes have found a place in the market as an acceptable alternative, especially if used in sauces or cooking.

KALAMATAS The #1 usage is for Greek salads but they are excellent table olives. They can also be used to flavor or garnish your favorite dish.

KALAMATA STYLE Used the same way as the real Kalamatas, but these are a less expensive alternative.

GREEK NATURAL These olives, also known as Greek Black, have a similar flavor profile to the Kalamata. They are round in shape and tend to be large. They are grown in other areas of Greece and can be used as a table olive or as an ingredient.

PEPPERONCINI These make a wonderful addition to any salad and can be served as an appetizer or in an antipasto. They can also be added to sandwiches if they are de-stemmed.

GIARDINIERA This is excellent addition to salad bars and creates an outstanding color presentation. It is also used as an antipasto.
